# Cuffsurre® Mini Solution

The new launched Cuffsurre Mini device is a perfect solution for real time continuous cuff pressure monitoring. This continuous pressure monitoring could reduce the incidence of tracheal ischemia and post-operative complications and low down the risk chances of ventilator associated pneumonia (VAP).

## Cuffsurre® Mini

### Easy to use:

- Non-electronic, less maintenance and no noisy
- Mini size with 50 cm extension tube, handle easily
- Color belt indicator with numbers scale
- Vivid indicator up and down range help judge patient situation

### Diverse:

- JS-LCM1550(15-50cmH<sub>2</sub>O), suitable for intubation cases in OR/first aid
- JS-LCM1040 (10-40cmH<sub>2</sub>O), suitable for ICU cuff pressure maintenance

### Other features:

- Accuracy  $\pm 2\text{cmH}_2\text{O}$
- 7\*24h continuous used on invasive positive pressure ventilation(PPV)
